From the #1 bestselling author behind books like
The Paradise Conspiracy; Lawyers Guns & Money;
Daylight Robbery and more

SEDUCTIVE MARKETING & MEDIA SPIN are just two of the tools social engineers are using - not to sell you a product but to change the way you, and your children, think, forever.

Ian Wishart is back with his hardest-hitting book yet, **EVE'S BITE**, an exposé of just how much damage social engineering and political correctness have done to New Zealand and the western world.

Wishart tracks the spread of the world's most contagiously deadly ideologies and finds them now deeply rooted in schools, universities, workplaces and governments throughout the West. He looks at *who* is behind them and *why*.

Record murders, sex crimes, social and family breakdowns How has the West slipped so far in just two generations - did we win the battles last century only to lose the war? Can New Zealand and the West survive, or is this the fall of Rome all over again? There are answers: they're in **EVE'S BITE**
